

The Angelcare sensor Pad picks up the **BREATHING VIBRATIONS** of your baby and relays it to the Nursery Unit.

**Important:** When monitoring the breathing movements of more than one baby. **Each baby needs to be on a separate sensor pad and mattress, in separate Cots** When a breathing sensor is placed underneath or on a baby it can not differentiate between the two babies on one mattress.

Should you have any questions please feel free to contact our customer care centre: 011 791 6309 or [www.angelcare-monitor.co.za](http://www.angelcare-monitor.co.za)
